**Warning and Disclaimer**

Every effort has been made to make this book as complete and as accurate as possible, but no warranty or fitness is implied. The information provided is on an "as is" basis. The author and the publisher shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the CD or programs accompanying it.

When reviewing corrections, always check the print number of your book. Corrections are made to printed books with each subsequent printing. To determine the print number of your book, view the copyright page. The print number is the right-most number on the line below the "First Printing" line. For example, the following indicates that this is the 1<sup>st</sup> printing of this title and it was printed in May 2003.

*First Printing: May 2003*

06 05 04 03      4 3 2 1

## First Printing Corrections

Pg	Error	Correction
15	Top of page, replace the fifth line of code: <code>MyForm.MouseDown += new Mouse Event Handler (MyForm.MouseEventHandler);</code>	With this line: <code>MyForm.MouseDown += new Mouse Event Handler (MyForm.MouseClicker_MouseDown);</code>
100	In step one, replace the first sentence	With this:  Create a new Windows Control Library project named ColorMixer.
101	Replace second sentence under long code listing	With this:  To test this control, create a new Windows Application project and drag the control from the toolbox and drop it on the Windows Form. Place a Button control (btnSetColor) and a Label control (lblColorSample) on the form and add the following code to the Click event handler of the Button control:
102	Replace text in Step 1	With:  In the ColorMixer project, make a copy of the ColorMixer.cs control and name the copy as ColorMixerWithEvents.cs. Using the Code view, replace all instances of ColorMixer with ColorMixerWithEvents.
103	Replace text in Step 4	With:  Build the code. Add an instance of the ColorMixerWithEvents control to the Windows Form that you created to test the ColorMixer control. Accept the default name of colorMixerWithEvents1.
103	Delete Step 5.	

103	Rename Step 6 to 5 and replace all of its text	With:  5. Add the following code to handle the Changed event of the colorMixerWithEvents1 control:  private void colorMixerWithEvents1_Changed(object sender, ColorMixer.ColorMixerWithEvents.ColorMixerEventArgs args) { lblColorSample.BackColor = Color.FromArgb(args.red, args.green, args.blue); }
103	Rename Step 7 to 6.
